HYDROPONICS

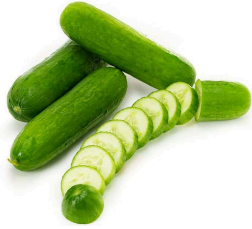

Hydroponics is a technique of growing plants using a water-based nutrient solution

Benefits of Hydroponics

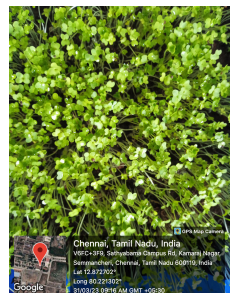

A 1200 square feet hydroponic farm established at Adanur is run by the beneficiaries of SAGO. This structure produces spinach, lettuce, microgreens, cucumber, tomato, chili, turmeric etc. with high nutritional value regardless of climatic variations

Services

- Sales of Vegetables and Greens
- Sales of Microgreens
- Training in Hydroponic cultivation
- Opportunity to visit the hydroponic poly house at Adanur
- Advice on setting up a small-scale hydroponics poly house
- Suggestion for setting up automatic system in hydroponic poly house
- Training on microgreen cultivation
